ABOUT ME 💭

Python programmer with several years of experience, mostly in analytics.
I like the problem solving aspect of programming.

EXPERIENCE 👨🏻‍💻

Python Developer / Knowledge Data Scientist for Sustainalytics

May 2021 - Present

- Developing Python based web crawlers to detect companies' involvement within various ESG indicators
- Developing text mining algorithms, taxonomies and regular expressions used in data collection
- Python scripting to deliver crawl results to our analysts
- Continuous improvement of existing web crawler's performance metrics

Data Analyst for Ericsson

September 2020 - May 2021

- Developing reports and dashboards from data stored in various sources (SQL server databases, flat files, SAP BI, etc)
- Implementing automated Python scripts to ensure data integrity and completeness
- Performing various ad-hoc analytics tasks and communicating the results to external customers and internal stakeholders

VBA Developer for Molson Coors Beverage Company

February 2020 - August 2020

- Making Excel macros and Python scripts to eliminate manual labor
- Debugging and maintaining existing scripts

AP for DB Schenker

June 2016 - February 2020

- Development and implementation of several python and excel based tools which reduced FTEs and the workload for colleagues
- Training junior and senior staff
- Subject Matter Expert on accounts payable processes
- Working for Danish customers in the Danish language

EDUCATION 🧑‍🎓
